

Interpretation Services – Vendor & Pricing Comparison

Current benchmark: Voiance — OPI: **\$0.85/min** | ASL: **\$0.85/min** | Third-Party OPI: **\$0.18/min**.

Executive view: Voiance's reported \$0.85/min OPI and ASL rates are highly competitive versus publicly documented alternatives. Several major providers do not publish enterprise rates, so a formal quote is required for an apples-to-apples comparison.

Provider	OPI (\$/min)	ASL / VRI	Coverage / Capabilities	Pricing Status
Voiance (CyraCom)	\$0.85 (\$0.81 in one contract example)	\$0.85 reported benchmark	250+ languages; 24/7; phone interpretation; VRI supports ASL and 35+ common languages.	Current company rate; strong benchmark for negotiation.
LanguageLine Solutions	\$1.75 standard \$1.25 nonprofit example	\$1.85 ASL VRI example	240+ languages; 24/7; 20,000+ certified interpreters; phone/video; analytics and integrations.	Public examples available; enterprise pricing may differ.
Propio Language Solutions	Custom quote	Custom quote	300+ languages; 24/7/365; OPI, VRI, ASL, onsite; Propio ONE and AI-assisted options.	No public enterprise rate found.
ALTA Language Services	Custom / package pricing	Custom	200+ languages; 4,000+ OPI interpreters; VRI; 24/7 OPI; quality and compliance controls.	Rates not publicly disclosed.
Partners Interpreting	Custom / pay-as-used	ASL-focused; VRI/onsite	230+ languages; 24/7 OPI; 3,000+ qualified interpreters; strong ASL specialization.	No monthly fees/minimums stated; rate requires quote.
Rapport International	Custom / flat per-minute	Custom	200+ languages; 24/7/365; no hidden/connection fees stated; 20–30 sec average connection.	No public numeric rate found.
Language Link	Custom	Custom	240+ languages/dialects; month-to-month; healthcare-focused; HIPAA/HITECH compliant.	Contract rates available; no public numeric rate found.
Language Scientific	Custom	Custom	215+ languages; 24/7/365; 3,200+ on-demand interpreters; no minimum usage/fees stated.	No public numeric rate found.
Third-Party OPI	\$0.18	N/A	Third-party interpreter added to a domestic call; structurally different from full OPI service.	Contract example; not directly comparable to interpreter-provider pricing.

Recommendation

Do not switch immediately. Based on the available pricing evidence, Voiance's \$0.85/min OPI and ASL rates are already below the publicly documented LanguageLine examples and appear highly competitive. The best strategy is to run a targeted mini-RFP with Propio, Boostlingo, ALTA, Rapport International and Language Link while using \$0.85/min as the benchmark. Ask each vendor for an all-in enterprise rate with no hidden connection fees, minimums, or surcharges, plus 24/7 coverage, ASL/VRI availability, SLA and HIPAA/compliance terms. If a comparable provider can reliably deliver OPI/ASL at approximately **\$0.65–\$0.75/min**, a switch or dual-vendor strategy may create meaningful savings. Otherwise, use competitive bids to renegotiate Voiance, especially through volume commitments or bundled services. The \$0.18/min third-party OPI rate should be evaluated separately because it represents a different service model and should not be treated as a direct replacement for interpreter services.

Key considerations before selecting a vendor

Compare effective cost per interpreted minute; connection/wait billing; minimums; language availability; ASL/VRI quality; 24/7 response time; interpreter certification; HIPAA/security requirements; reporting; API/EHR/contact-center integrations; service-level agreements; and transition/onboarding costs.

Research note: Prices shown as "custom" were not publicly disclosed in the research reviewed. Public pricing examples can vary by customer type, volume, contract, geography and service configuration. Voiance and third-party OPI figures reflect the current benchmark provided for this analysis and contract evidence identified during research.
